Git_Out_Me_Swamp: OSINT - Beginner

Creator: Eddie Points: –

Description

This challenge is going to require the competitors to know some git commands and some knowledge of Shrek. :) They will have to find Eddie's github which has a repo titled "The Swamp" in the starred section of the page. This will test their searching, attention to detail, and git skills.

Github Path: Capture_the_Flame_2026/OSINT/Git_Out_Me_Swamp

Prompt

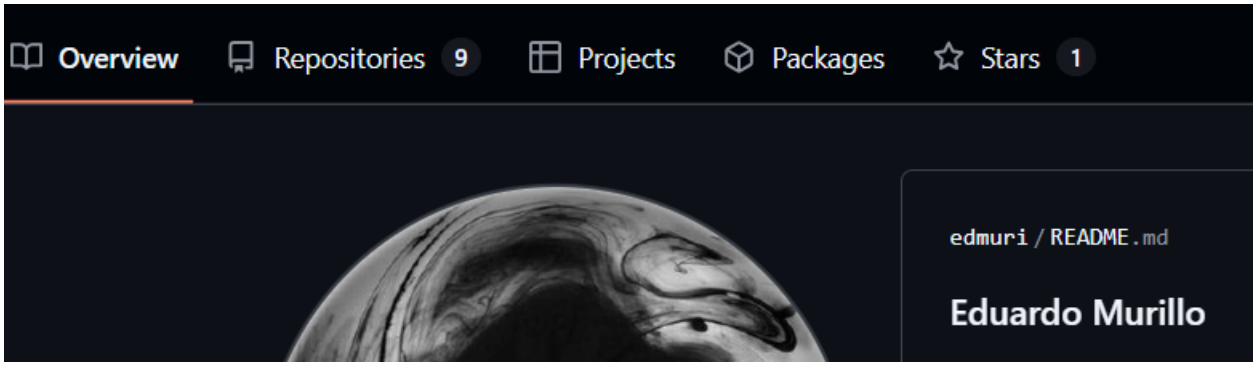
We've heard rumors of one of our Experience members teaming up to do evil work with an ogre! We have to find out who it is and find a way to stop it. I overheard them talking about going to some Swamp to meet up. Could you help us put an end to this conspiracy?

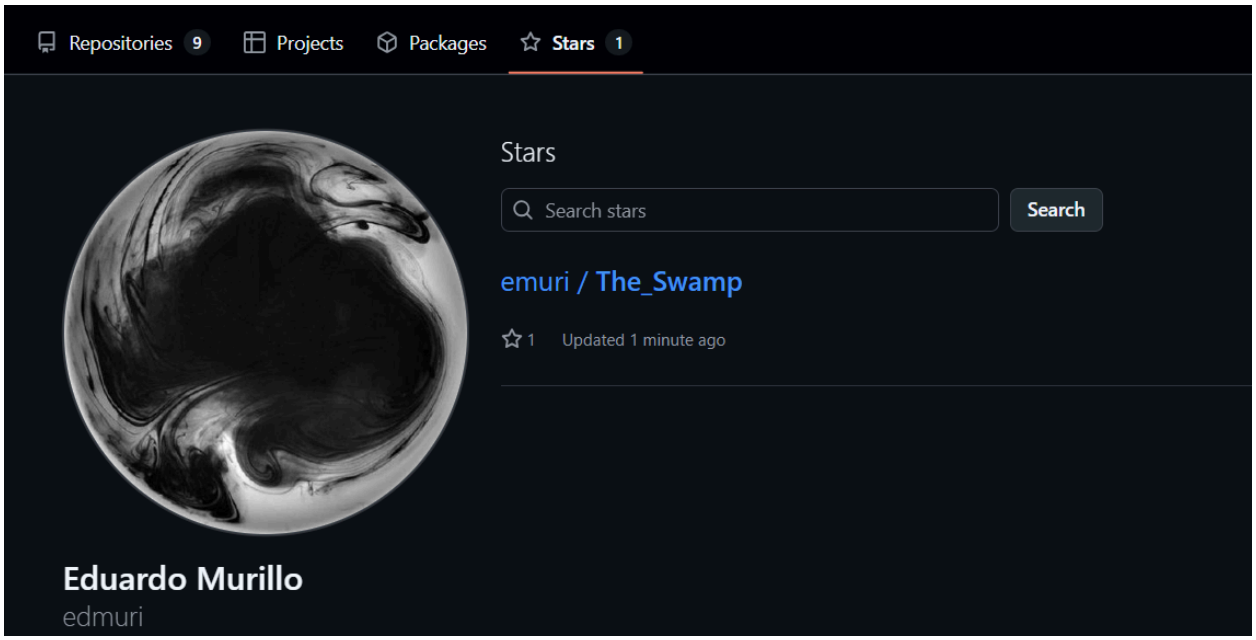
Hints

1. Is there a location where all our team members are listed?
2. The frog says GREPIT
3. Maybe there's some kind of key!

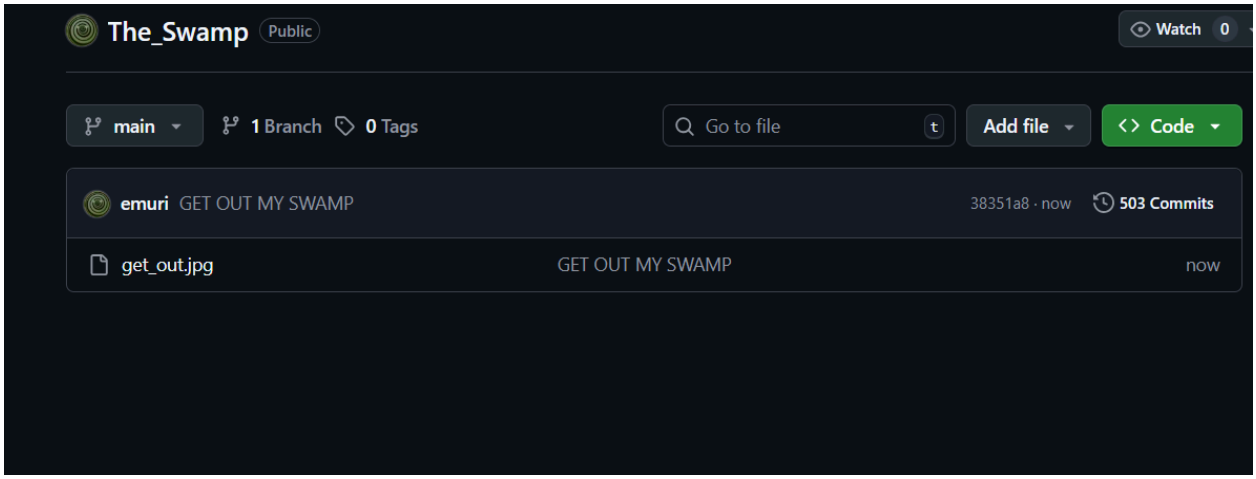
Solution

1. The competitor is going to have to find the github of Team Lead Eddie. This can be done through the Capture the Flame webpage.
2. Once they get to the github page. They can go through the repos to no avail, and they will have to go to the Stars tab to the left and will find a starred repo named "The_Swamp"





3.Once they go to The_Swamp, they will find a repo with hundreds of commits and a single image in the final commit.



4. They will have to clone the repo and search the commit history using git commands

5. They will have to use the command: git log --grep="THE PROPHECY GROWS" --invert-grep

This is because all the commits except the key and red herrings have the same commit title of "THE PROPHECY GROWS"

```
The_Swamp$ git log --grep="THE PROPHECY GROWS" --invert-grep
commit 38351a8ba31e9a77ef1d4d245e5898d5a21f6422 (HEAD -> main, origin/main)
